1 Why This Policy Exists

Neurolith is shared by everyone who uses it. This policy lists what is not allowed so that calls stay fast, limits stay fair and the community stays safe. It is part of our Terms of Service.

2 Scraping, Automation & Reselling

- No scraping, bots or scripts that send automated or bulk requests to the website or the Discord bot.
- No reselling or commercially redistributing calls, for example in paid signal groups, without written permission.

3 Limits & Accounts

- No creating multiple accounts, rotating emails or IP addresses, or other tricks to get around free limits.
- No sharing, selling or renting accounts or subscriptions.

4 Attacks & Abuse

- No attempts to overload, disrupt, probe or break into Neurolith, its bot or its infrastructure.
- No attempts to access another person's account or data.
- Found a security problem? Tell us at neurolithbusiness@gmail.com instead of exploiting it.

5 Illegal Use & Market Manipulation

- No using Neurolith for anything illegal where you live.
- No using calls to promote pump-and-dump schemes, coordinated manipulation or misleading promotions of any token.
- No claiming Neurolith endorses a token, project or person.

6 Impersonation & Scams

No pretending to be Neurolith, its team or its bot. Neurolith will never ask for your wallet, private keys, seed phrase or passwords, or ask you to send funds. Anyone who does is not us: please report them.

7 What Happens When the Rules Are Broken

Depending on how serious it is, we may warn you, limit your use, suspend or close your account, remove you from the Discord server, or report the activity to the relevant authorities. Paid time lost this way is not refunded.
